🔒 Team Instructions

1. Assign one member of your team as "captain".
   a. The captain will open the **Captain link*** in their browser (we recommend using Google Chrome and avoiding Internet Explorer).
   b. We strongly recommend that the captain shares their screen through the video conference platform (if you are not in the same room).
   c. Don't be team captain if you potentially have to quit the escape midway or if your internet connection is unstable.

2. The other participants will open the **Participant link*** in a browser tab/window of the computer they are using for the video conference (recommended) or on another device (i.e. cellphone, tablet).

3. Make sure you have read the introduction page and when you are ready to start, each team member will click on "Start your escape".
   a. If your team needs an extra hint, they are only available through the **Captain link*.** It therefore becomes a team decision to take a hint or not. (There is a 1-minute penalty per hint used.)

4. The links are not synced together. That said, once you find a password, each team member will need to enter it on their respective link to advance together, one puzzle at a time.

5. When you have completed the escape room, the team captain can submit your team name in the leaderboard.
   a. If you don't complete the escape, your captain can click the "End your escape" button at the bottom of their page to insert a team name into the "Incomplete solves" section of your leaderboard.

Good luck and have fun!

*The person in charge of your event will send you these two links by email
*See page 2 to understand the difference between both links

*Captain link:

- **Mandatory** for each team (opened only by the captains)
- Contains all the text and images to solve each step
- Ability to submit all passwords
- Contains the **timer**, the **hint system** at the bottom of each step and the ability to **submit** a team name in the leaderboard upon completion of the escape room

*Participant link:

- Opened and used by all other players that aren't assigned as team captains
- Contains all the text and images to solve each step
- Ability to submit all passwords
- **Does not** contain the timer, the hint system or the ability to submit a team name
- This link is **optional**, but it increases everyone's participation and makes it easier for participants to browse content on each page

*The person in charge of your event will send you these two links by email
